## *The Ultimate Yacht*

29m Luxury Catamaran

Our larger power yachts feature all the typical characteristics of our other designs; they are fast, efficient, economic and seaworthy. Given the intended use for these vessels is primarily cruising or as a show boat, special attention is paid to the styling. We use the latest solid modelling and rendering packages, enabling our clients to know exactly what their vessel will look like completed quite early in the design stage.

Typically our larger power yachts are designed custom for each client, although some of our previous designs are available.

C29M Interior

Design No. 161 - Luxury Motor Yacht

Designs from 16.5m to 85m

Design No. 96 – Sailing Cat

## The Long Distance Trawler Cat Motor Yacht

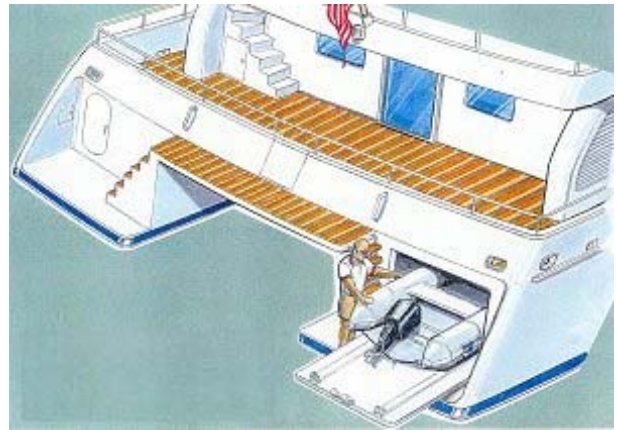

Design No. 350 - 45ft Power Catamaran

Power catamarans styled as trawlers are becoming increasingly popular among cruising yachtman, particularly in the United States. AluminumNow's Partners have been busy designing these vessels since 1998, with the latest launched in Canada (May 2000). Naturally the knowledge we have gained from designing vessels for the commercial and pleasure powerboat industry has been directly applied to our trawler catamarans.

Generally our clients want their trawler catamaran to have the following characteristics:

- Proven hull design
- Low resistance
- Excellent seakeeping
- 15 to 20 knots cruising speed  
25 Knots max.
- Long range capabilities
- Robust structure
- Simple, economic construction
- Appealing style

Transom Garage

Design No. 386 - 60ft Power Catamaran

Interior arrangements vary from client to client. This type of vessel yields a high internal volume; allowing large master and guest bedrooms with ensuite bathrooms, open plan saloons with spacious galley, dining and lounge areas, transom garages for watertoys and tenders, hull compartments for a workshop and laundry, etc.

Typically our trawler catamarans are designed as a custom vessel for each client. This page features some of our designs to date.
